

**INFORMED CONSENT AND AFFIDAVID
WITH ONLINE ANTIGEN TESTING TO DETECT THE PRESENCE OF THE SARS-COV-2 VIRUS ANTIGEN**

Please pay attention to the information below and read it carefully.

1.1. Online Testing designation, its purpose and expected benefit, including possible risks

The purpose of antigen testing for the presence of SARS-CoV-2 virus antigen using in-vitro antigen test kit for testing for the presence of SARS-CoV-2 virus antigen approved for use in the European Union (“**Test**”) through an audiovisual link via www.tele-medicine.it (“**Online Testing**”) is to detect the presence of SARS-Cov-2 virus antigen (“**Virus**”) in sputum samples of the test subject using the Test.

This is a routine procedure associated with the minimum possible complications, the result of which is important for the maximum prevention of the transmission of the virus and for any further treatment and diagnostic procedures.

1.2. Telemedicine benefits of Online Testing and alternative solutions

The principle of Online Testing is based on the use of telemetry transmissions via the Internet. The testing to detect the presence of the Virus antigen will be performed by the test subject using the Test in their home environment with a medical officer providing online assistance via a video call www.tele-medicine.it.

As an alternative to Online Testing, a SARS-CoV-2 antigen testing may be administered by a healthcare professional at one of the certified testing centers; other alternatives include PCR testing using a nasopharyngeal swab and other similar methods. Another alternative is vaccination against the Virus.

1.3. Possible restrictions for Online Testing and data on treatment regimen and prevention

There are no medical restrictions for Online Testing. Before using the Test, please read the instructions for use carefully and follow the instructions of the medical officer during the Online Testing.

If the Test produces a positive result, the competent public health authority will be notified that the test subject was tested with a positive result, and all other applicable obligations arising from the current regulations of the Government or the Ministry of Health and other legal regulations for the tested person and healthcare providers included in the antigen sampling network (“**Measures**”) will be complied with.

AFFIDAVID OF THE TESTED PERSON

I hereby declare that:

- I have been informed of all of the above, as well as of my right to freely decide whether or not to agree with the Online Testing;
- I have been personally trained to use the Test in accordance with the instructions for use;

- I will follow the instructions of the medical officer and, in particular, I will not tamper with the Test during Online Testing in any way; I am aware that the test kit must be visible throughout the entire video call (i. e. in this case, it must be in taken by the camera of the device I am using); if this rule is broken, Online Testing will be terminated without compensation;
- I am aware that the Online Testing will take place without the physical presence of a medical officer, and I have been instructed on how to dispose of the used Test;
- I understand that a positive result of Online Testing will be reported to the competent regional public health authority, and I will subsequently proceed in accordance with the relevant Measures;
- I understand the information that was provided to me, all my additional questions were answered clearly, and I have no further questions or issues that remain unclear to me.
